

Fast and Easy Schedules from Outlook

ScheduleIt! from Best Wave is the quickest, easiest, and least expensive way to create and deploy room schedule displays outside your meeting and conference rooms. With ScheduleIt! you simply update your Outlook calendar and the digital signs outside of each meeting room are updated!

COMPATABILITY

ViewSonic CD1010 network photo frame, NMP-550/600 or other SMIL compatible media players.

Most computers, mobile devices and network-ready LCD screens with a web browser that allows its controls to be hidden.

Most commercial LCD screens with a USB port and the ability to play JPG images.

SIMPLICITY

Just update your Outlook calendar as you always have. Select the room name from the Location: pop-up menu to link the event to the correct room display. That's it!

LOW COST

No big up-front fees, or recurring per-display costs. License for only as many displays as you need, and add more anytime.

6, 12, 24 OR MORE ROOM DISPLAYS

ScheduleIt! can handle any number of rooms networked to your central server. The displays "pull" content, so there is virtually no limit to the number of rooms.

USB SNEAKER-NET OPTION

No network? No problem! ScheduleIt! will export the content for any room to a USB thumb drive, which you can plug into your SMIL compatible screen or media player. In addition, many LCD screens have built-in JPG players that will work just fine!

SIMPLE FORMATTING

Formatting the look of your room schedules is as simple as clicking on a line of text and typing. You can set the Title, Sub-Title and Footer text to anything you want.

MASTER FORMAT

The built-in Master format can be modified so that new displays will take on the look you want. Then tweak the individual room formats as necessary.

FONT FLEXIBILITY

Each text line is set to any Font, Style, and size you want, including your Corporate font.

FONT COLORS

Each line of text can be set to any of 16 different colors. All the text can be the same, or every line can be a different color.

BACKGROUNDS

ScheduleIt! includes 31 sample backgrounds that you are free to use as-is, or modify to fit your Corporate color scheme. You can also incorporate backgrounds created by your art department for the ultimate in design flexibility.

DATE AND TIME

You may add the date in short or long format or the current time to the Title, Sub-Title, or Footer line on any schedule. Just include [time], [short date], or [long date] in the text!

LOTS OF ROOM

Depending on the font size you select for events, ScheduleIt! can put up to 16 lines of event information on a screen. You need more? ScheduleIt! will create a second screen automatically and cycle between the two every six seconds, giving you up to 32 events per day per room!

UPDATING FLEXIBILITY

Set your updates to occur every minute, every four hours, or anything in between! You control how often updates occur.

VIEW WHAT IS BEING SHOWN

ScheduleIt! has a viewing area where you may select any room from a pop-up menu and see what is being displayed.

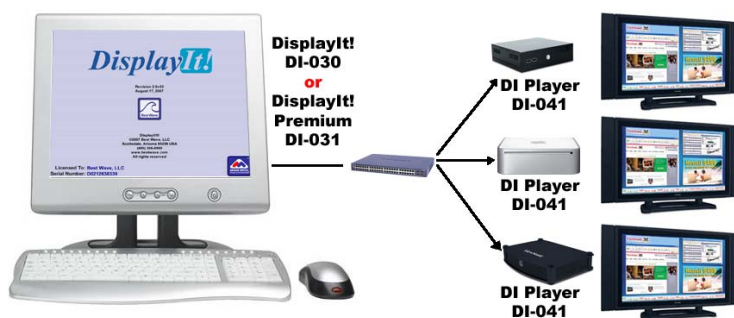

Best Wave ~ Software Price List
